

OFF SPEC TANK Strathcona Resources Orion Facility Cold Lake, AB

As the primary contractor Federation managed and executed the project scope from design support and civil to commissioning. With our wide range of in house professionals and tradespeople we were able to complete the scope of work with minimal up front engineering and a very short timeline. Multiple trade and professional disciplines worked simultaneously to complete the project without incident, on time, and up to all industry and client standards.

- 3D Scanning, modelling, and isometrics
- Pile layout and support
- Structural design, fabrication, and installation
- Piping design, fabrication, and installation
- Electrical and instrumentation consultation, procurement, and installation
- Scaffolding, insulation and cladding, blankets, line labelling, and commissioning

Schedule: March 2022 - January 2023

Contract Type: Time & Materials

Contract Value: \$3,500,000
