

MOC PROGRAM Strathcona Resources Orion and Tucker Facilities Cold Lake, AB

Federation Construction has been retained to assist Strathcona Resources with project construction for a portfolio of sustaining capital and production expansion projects at their Orion and Tucker SAGD facilities. These projects are located throughout the plant and offsite areas, requiring all disciplines of construction services. Federation Construction works alongside Federation Engineering to deliver a full turnkey solution. Federation has worked on this portfolio at Orion since 2013, and began working on the Tucker portfolio in 2022 after Strathcona's purchase of the property.
